Gentlemen:

Enough is enough, time for settling this matter once and for all. Put a stop to these delays so that MS can get back to business. They have provided a service for us consumers that has been extremely important in the advancement of computer science. So many Americans can now and do, have computers in their homes. I believe without MS this would not have happened.

Why do we want to punish a company that brought USA to the top of this industry?

Kathleen Laitila
